Womanish foeticide is one of the most sensitive and burning issues not only for India but for the whole world. It's a general supposition that advanced countries with better knowledge rate may have better coitus rate but this supposition is questioned if one looks at the data. This process began in the early 1990s when ultrasound ways gained wide use in India. There was tendency for families to continuously produce children until a manly child was born. This was primarily due to the large sexist culture that exists in India against women. This is reflected by knowledge rates among women as well as profitable participation, which are both particularly low in countries where womanish foeticide is prominent, and an unstable population rate exists alongside. The government originally supported the practice to control population growth. The Preconception and Prenatal Diagnostic Techniques (PCPNDT) Act was passed in 1994, making coitus-picky revocation illegal. It was also amended in 2003 holding medical professionals fairly responsible. Still, the PCPNDT Act has been inadequately executed by authorities.

Womanish foeticide is the aborting of a girl foetus in the womb before its complete growth. Why? This is because that it's womanish? Womanish foeticide has come a shy and shocking verity of our nation. In India a strong fondness for sons over son. People ask lower families with comparatively lesser sons by abuse medical technologies. It's one of the main motives for declining coitus rate.

WHAT'S WOMANISH FOETICIDE?

Womanish foeticide is the procedure of revocation to terminate womanish fetus from the womb of the mama before taking birth after the coitus recognition tests like an ultrasound check-up. Womanish foeticide and indeed any coitus recognition test is illegal in India. It's the shame for the parents who are despairing for a baby boy as well as croakers doing revocations especially for this.

CAUSES OF FEMALE FOETICIDE

Womanish foeticide has been in practice for ages especially for the families who have a preference only manly child. Several religious, social, fiscal and emotional are the reason for womanish foeticide. Thus, the time has been changed now much still, numerous reasons and beliefs are ongoing in some families. Some main reasons for womanish foeticide are

- 1) Generally, parents do not want a girl baby because they've to give a big quantum as a dowry at son's marriage.
- 2) There's a faith that girls are always consumer and boys are the only patron. Therefore, Parents understand that son will earn plutocrat for the whole life and watch their parents still girls will get married a day and will have a separate family.
- 3) There's a belief that the son will carry the name of the family in future still the girl has to carry the hubby's family.
- 4) This is a prestige issue in society for parent and grandparent to have a boy baby in the family besides having a son.
- 5) There's a stress on the new bridegroom of the family to give birth to a manly child so she's executed to go for coitus recognition and repeal if girl baby.
- 6) Ignorance, instability, and poverty of people in society are also major reasons for girl baby burden.

Science and Technological advancement and serviceability have made this veritably easy task for parents.

Impact of womanish foeticide on the coitus rate-

Coitus rate denotes the rate of ladies to males in a specific region. Numerous practices like womanish foeticide and womanish infanticide (killing a baby girl after her birth) have had a contrary influence on the coitus rate. Therefore, it rises and promotes numerous social immoralities.

As per the decennial Indian tale, Coitus Rate of India is 107.48. It means 107.48 males per 100 ladies in 2019. Thus, India has 930 ladies per 1000 males. So, India has 48.20 womanish population compare to 51.80 manly population.

EFFECTIVE MEASURES TO CONTROL

As we all know that womanish foeticide is a crime and social wrong for the future of women. Hence, we should notice the causes for womanish foeticide in Indian society. Womanish infanticide or womanish feticide is primarily because of coitus determination. Some measures are

- 1) Law must be enforced, and one should be surely penalized if plant shamefaced for this unkind exercise.
- 2) Endless cancellation of license should be done if it's going on in medical practice.
- 3) Marketing of medical tools specifically for illegal coitus determination and revocation should be a bane.
- 4) Parents must be fined who want to kill their girl baby.
- 5) Juggernauts and forums should be regularly held to apprehensive of youthful couples.
- 6) Women should be apprehensive so that they can be more attentive to their rights.

VARIOUS LAWS IN INDIA FOR THE FUTURE

1. Section 312 of the Indian Penal Code 1860 read with the Medical Termination of Gestation Act, 1971 where all the restrictions assessed therein, including the time limit of 20 weeks, other than the bones to insure good medical conditions, infringe the right to revocation and the right to health, which radiate from right to life as guaranteed under Composition 21 of the Constitution. Right to revocation is a species of right to sequestration, which is again placarded a continuance of the right to life under Art 21 of the Constitution.

CONCLUSION

Forthcoming is the name of your girl child; history is the name of your mama. This is the reality that NO PRESENT, NO PAST, NO FUTURE WITHOUT GIRL CHILD. Womanish foeticide is self-murder. So, save the girl child and secure the future. There will be the dangerous results of the womanish feticide. Demography reports advise India that in the coming twenty times there will be a failure of misters in the marriage request substantially because of the adverse coitus rate.
